## HURRICANE SEASON IS HERE ARE YOU PREPARED?

Hurricane season begins tomorrow – June 1<sup>st</sup> – so now is the time to prepare your home, family and business in the event that a storm would threaten to impact our area.

### WHY PREPARE NOW?

**It only takes one storm** to severely impact your life and the community at large. South Florida learned that lesson when Hurricane Andrew – the first storm of the 1992 season – impacted the region in August of that year. Preparing your plan and purchasing supplies for your home in advance helps minimize last-minute chaos, so that you can focus on securing your home and assisting loved ones as needed. Imagine if everyone waited until the last minute to purchase supplies – stores would be grid locked and supplies would run low. Unfortunately, this mayhem is common because of the surge of shoppers that wait until a storm is headed our way to purchase necessary supplies.

### WHAT DO YOU NEED?

Visit [Westonfl.org/Hurricane](http://Westonfl.org/Hurricane) to find out what you should have in your **personal Disaster Kit**. You should have enough supplies to sustain your family for 3 – 5 days following the storm. Basics include non-perishable foods, bottled water, medicines, baby formula/diapers, battery-operated radio and flashlights.

**Be Prepared...It Only Takes One**
